## COLLEGE OF PHARMACY

IMPARTING EXCELLENCE IN EDUCATION & RESEARCH

Approved by AICTE & PCI New Delhi, Recognized by the Government of Maharashtra,  
2F,12B recognition by UGC, Affiliated to Savitribai Phule Pune University  
Accredited by NAAC with A Grade

### 7.1.2.1: INSTITUTION HAS FACILITIES FOR ALTERNATE SOURCES OF ENERGY AND ENERGY CONSERVATION MEASURES

#### 1. Solar Energy Plant

As part of energy conservation and use of renewable energy solar panel installation on terrace of the institutions in the campus has been executed and it is connected to MSEB grid. The solar system is installed by Bosch Inc.

**Project Details: 300 kWp Grid Connected Rooftop Solar PV Plant**

**Locations:**

1. AISSMS College of Pharmacy – 50 KW
2. AISSMS College of Engineering and Polytechnic - – 150 KW
3. AISSMS Institute of Information Technology - – 100 KW

## 7.1.2.2: MANAGEMENT OF THE VARIOUS TYPES OF DEGRADABLE AND NON-DEGRADABLE WASTE

The college has efficient system for waste management. The building premises are cleaned everyday and the work has been outsourced to M/s D. M. Services. The cleaners collect the solid waste in appropriate containers and these wastes are handed over to Pune Municipal Corporation for disposal. **Reduce and reuse** policy is used to minimize waste generation. Wet waste (Dry and Wet Leaves, Food) is collected and decomposed using wet waste decomposing unit which is being used as fertilizer for medicinal plant garden (**Rot**). As well as empty glass bottle scarp handed over to New Neeta Chemicals, Pune (**Recycle**).

The extent of liquid chemical waste generated is negligible which is diluted with water and flushed through drainage system.

The college has collaboration with Pasco Environmental Solutions Pvt. Ltd., Pune for collection and disposal of dead and sacrificed animal waste.

E-waste management: Monitors and CPUs are **repaired and reused** in most of the cases. Non-repairable Computers, Monitors, OHP, LCD projectors, peripherals and UPS batteries are collected and handed over for proper **recycle of spare parts/disposal** to M/s Sakshi Enterprises who is approved scrap dealer.

Waste generated from microbiology laboratories is autoclaved and then disposed off.

Hazardous chemicals required for laboratory usage are stored isolated as per norms and handled carefully under the supervision of staff in fume hoods. The Sign boards are displayed as well as Material Safety Data Sheets are provided in laboratories in case of any immediate corrective actions required.

College has displayed Awareness Boards as well as conducts awareness programs to minimize waste generation (**Refuse**)

The college does not deal with radioactive substances.

### 7.1.2.3: WATER CONSERVATION FACILITIES

#### 1. Rain Water Harvesting

Rain water harvesting is a technique of collection and storage of rainwater into natural reservoirs or tanks, or the infiltration of surface water into subsurface aquifers before it is lost as surface runoff. Rain water harvesting system was incorporated in the architecture plan and has been installed in the college building right from its inception. The water from rooftops and floors is collected through down pipes and discharged in recharge pits of borewell through pipe lines in the campus. The system ensures percolation of the rainwater into soil. Inspection and annual cleaning of the down-pipes is done as a part of general maintenance. Maintenance typically consists of the removal of dirt, leaves and other accumulated materials.
