2. Biodecompost Pit Units Installation

Installation of biodecompost pits were done at medicinal plant garden of the Pharmacy College by agency CONSERVATION EDUCATION & RESEARCH INSTITUTE. The installation of biodecompost pit units at AISSMS College of Pharmacy has proven to be a successful initiative in promoting sustainable waste management and environmental awareness. The project's success lies in the collaborative efforts of students, staff, and administration. By effectively managing organic waste and producing nutrient-rich compost, the college has taken a significant step towards reducing its ecological footprint. This initiative not only contributes to a cleaner and greener campus but also imparts valuable lessons on waste reduction and environmental responsibility to the college community.

3. Native Tree Trasplantation:-

Due to massive Metropolitan construction plants which came under the construction plan were cut down, so to preserve those native plants which cannot be preserved on-site, replanting of these plants was done at the backyard of AISSMS college of Pharmacy. As we know native plants are often adapted to local conditions and support local ecosystems. Our teaching and non-teaching staff and ecorangers participated enthusiastically in this eco-friendly programme.
